How did the Fund perform last year?

VP Asia 30 seeks investment results, before fees and expenses, that track the performance of the ProFunds Asia 30 Index® (the "Index").

The Fund invests in securities that ProFund Advisors believes, in combination, should track the performance of the Index. During 2024, underperformance of international markets and a late-year U.S. dollar rally hampered performance relative to the S&P 500® Index.

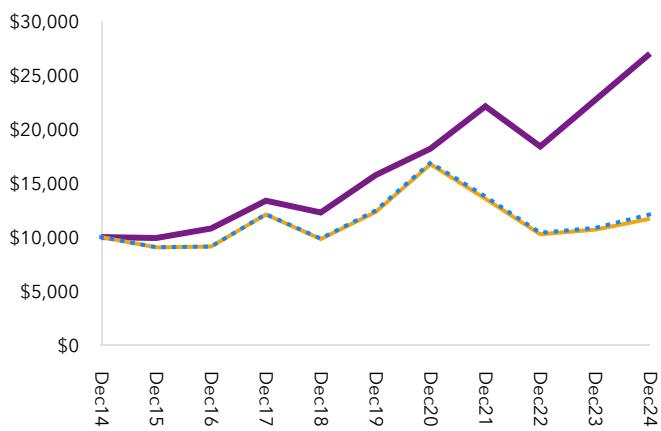

For the year ended December 31, 2024, the Fund had a total return of 11.56% and an average daily statistical correlation of over 0.99 to the daily performance of the Index. For the same period, the Index had a price return of 9.44% and a volatility of 26.01%.

Primary factors affecting Fund performance include the total return of the securities held by the Fund, expenses, transaction costs, the volatility of a Fund's index, and other miscellaneous factors.
