What were the Fund's costs for the last year?

(based on a hypothetical \$10,000 investment)

Fund Name	Costs of a \$10,000 investment	Costs paid as a percentage of a \$10,000 investment
ProFund VP Financials	\$192	1.68%

How did the Fund perform last year?

VP Financials seeks investment results, before fees and expenses, that tracks daily performance of the S&P Financial Select Sector Index (the "Index").

The Fund invests in financial instruments that ProFund Advisors believes, in combination, should track the performance of the Index. During 2024, a steepening yield curve helped the financial sector keep pace with the strong performance of the S&P 500® Index.

For the year ended December 31, 2024, the Fund had a total return of 28.45% and an average daily statistical correlation of over 0.99 to the daily performance of the Index. For the same period, the Index had a total return of 30.56% and a volatility of 13.99%.

Primary factors affecting Fund performance include the total return of the securities and derivatives held by the Fund, the performance of the reference assets to which the derivatives are linked, financing rates paid or earned, expenses, transaction costs, the volatility of the Fund's Index, and other miscellaneous factors.
