What were the Fund’s costs for the last year?

(based on a hypothetical \$10,000 investment)

Fund Name	Costs of a \$10,000 investment	Costs paid as a percentage of a \$10,000 investment
ProFund VP International	\$169	1.68%

How did the Fund perform last year?

**VP International** seeks investment results, before fees and expenses, that track the performance of the MSCI EAFE Index (the "Index").

The Fund invests in financial instruments that ProFund Advisors believes, in combination, should track the performance of the Index. During 2024, underperformance of international markets, an underweight to technology, and a late-year U.S. dollar rally drove underperformance relative to the S&P 500® Index.

For the year ended December 31, 2024, the Fund had a total return of 0.88% and an average daily statistical correlation of over 0.99 of the daily performance of the U.S.-traded MSCI EAFE Index futures contract. For the same period, the Index had a total return of 3.82% and a volatility of 11.95%.

Primary factors affecting Fund performance include the total return of the derivatives held by the Fund, the performance of the reference assets to which the derivatives are linked, financing rates paid or earned, expenses, transaction costs, the volatility of the Fund’s Index, and other miscellaneous factors.
