How did the Fund perform last year?

VP Small-Cap Value seeks investment results, before fees and expenses, that track the performance of the S&P SmallCap 600® Value Index (the "Index").

The Fund invests in securities that ProFund Advisors believes, in combination, should track the performance of the Index. During 2024, the absence of 'Magnificent Seven' companies drove underperformance relative to the S&P 500® Index.

For the year ended December 31, 2024, the Fund had a total return of 5.87% and an average daily statistical correlation of over 0.99 to the daily performance of the Index. For the same period, the Index had a total return of 7.56% and a volatility of 10.20%.

Primary factors affecting Fund performance include the total return of the securities held by the Fund, expenses, transaction costs, the volatility of a Fund's index, and other miscellaneous factors.
