## What were the Fund's costs for the last year?

(based on a hypothetical \$10,000 investment)

Fund Name	Costs of a \$10,000 investment	Costs paid as a percentage of a \$10,000 investment
ProFund VP UltraMid-Cap	\$182	1.68%

## How did the Fund perform last year?

**VP UltraMid-Cap** seeks daily investment results, before fees and expenses, that correspond to two times (2x) of the daily performance of the S&P MidCap 400® Index (the "Index").

The Fund invests in financial instruments that ProFund Advisors believes, in combination, should produce daily returns consistent with the Fund's investment objective. The absence of 'Magnificent Seven' companies drove underperformance relative to the S&P 500® Index.

For the year ended December 31, 2024, the Fund had a total return of 17.02% and an average daily statistical correlation of over 0.99 to twice that of the daily performance of the Index. For the same period, the Index had a total return of 13.93% and a volatility of 15.89%.

The Index performance was driven by the strong equity environment, with an underweight in technology offset by strong industrials performance relative to the S&P 500®. Primary factors affecting Fund performance include the total return of the securities and derivatives held by the Fund, the performance of the reference assets to which the derivatives are linked, financing rates paid or earned, the types of derivative contracts used (and their correlation to the Fund's Index), expenses, transaction costs, the volatility of the Fund's Index, the impact of compounding, and other miscellaneous factors.

## Total Return Based on a \$10,000 Investment

Cumulative performance: January 1, 2014 through December 31, 2024

The chart above represents historical performance of a hypothetical investment of \$10,000 in the Fund over the past ten years (or since inception if shorter), assuming the reinvestment of distributions.
