Summary Prospectus

APRIL 30, 2025

ProFund VP Asia 30

This Summary Prospectus is designed to provide investors with key fund information in a clear and concise format. Before you invest, you may want to review the Fund's Full Prospectus, which contains more information about the Fund and its risks. The Fund's Full Prospectus, dated April 30, 2025, and Statement of Additional Information, dated April 30, 2025, and as each hereafter may be supplemented or amended, are incorporated by reference into this Summary Prospectus. All of this information may be obtained at no cost either: online at www.profunds.com/vp; by calling 888-PRO-3637 (888-776-3637) (financial professionals should call 888-PRO-5717 (888-776-5717)); or by sending an e-mail request to info@ProFunds.com. The Securities and Exchange Commission has not approved or disapproved these securities or passed upon the adequacy of this Summary Prospectus. Any representation to the contrary is a criminal offense.

Receive investor materials electronically:

Shareholders may sign up for electronic delivery of investor materials. By doing so, you will receive the information faster and help us reduce the impact on the environment of providing these materials. To enroll in electronic delivery,

1. Go to www.icsdelivery.com
2. Select the first letter of your brokerage firm's name.
3. From the list that follows, select your brokerage firm. If your brokerage firm is not listed, electronic delivery may not be available. Please contact your brokerage firm.
4. Complete the information requested, including the e-mail address where you would like to receive notifications for electronic documents.

Your information will be kept confidential and will not be used for any purpose other than electronic delivery. If you change your mind, you can cancel electronic delivery at any time and revert to physical delivery of your materials. Just go to www.icsdelivery.com, perform the first three steps above, and follow the instructions for cancelling electronic delivery. If you have any questions, please contact your brokerage firm.

Investment Objective

ProFund VP Asia 30 (the “Fund”) seeks investment results, before fees and expenses, that track the performance of the ProFunds Asia 30 Index (the “Index”).

Fees and Expenses of the Fund

The table below describes the fees and expenses that you may pay if you buy, hold, and sell shares of the Fund. The expenses shown do not reflect charges or fees associated with insurance company separate accounts or insurance contracts, which would have the effect of increasing overall expenses. Annuity and policy holders should consult the prospectus for their contract or policy for more information about such charges and fees.

Annual Fund Operating Expenses

(expenses that you pay each year as a percentage of the value of your investment)

Investment Advisory Fees	0.75%
Distribution and Service (12b-1) Fees	0.25%
Other Expenses ¹	0.84%

Total Annual Fund Operating Expenses Before Fee

Waivers and Expense Reimbursements	1.84%
Fee Waivers/Reimbursements ²	-0.16%

Total Annual Fund Operating Expenses After Fee

Waivers and Expense Reimbursements	<u>1.68%</u>
------------------------------------	--------------

1 The information in the table has been restated to reflect current fees and expenses.

2 ProFund Advisors LLC (“ProFund Advisors”) has agreed to waive fees and to reimburse expenses to the extent Total Annual Fund Operating Expenses Before Fee Waivers and Expense Reimbursements, as a percentage of average daily net assets, exceed 1.68% through April 30, 2026. This agreement may not be terminated before that date without the approval of the Fund’s Board. Amounts waived or reimbursed in a particular contractual period may be recouped by ProFund Advisors within three years subject to certain limitations.

Example: This example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds.

The example assumes that you invest \$10,000 in the Fund for the time periods indicated and then redeem all of your shares at the end of each period. The example also assumes that your investment has a 5% return each year and that the Fund’s operating expenses remain the same, except that the fee waiver/expense reimbursement is assumed only to pertain to the first year. It does not reflect separate account or insurance contract fees or charges. If these charges were reflected, expenses would be higher. Although your actual costs may be higher or lower, based on these assumptions your approximate costs would be:

	1Year	3Years	5Years	10Years
ProFund VP Asia 30	\$171	\$563	\$981	\$2,145

The Fund pays transaction and financing costs associated with the purchase and sale of securities. These costs are not reflected in the table or the example above.

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs. These costs, which are not reflected in the Annual Fund Operating Expenses or in the example above, affect the Fund’s performance. During the most recent fiscal year, the Fund’s annual portfolio turnover rate was 141% of the average value of its portfolio.

Principal Investment Strategies

The Fund invests in securities that ProFund Advisors believes, in combination, should track the performance of the Index.

The Index, created by ProFund Advisors, is designed to measure the performance of companies domiciled in the Asia/Pacific region (excluding Japan) and traded on U.S. exchanges. Companies may include those domiciled in Australia, New Zealand, Hong Kong, Indonesia, Malaysia, Philippines, Singapore, South Korea, Taiwan, Thailand, India, and China. The Index selects 30 companies based on liquidity and then weights them based on market capitalization. The selected companies are listed in an appendix to the Statement of Additional Information. The Index’s composition and assigned weights are reevaluated annually. The Index is constructed and maintained by ProFund Advisors.

Under normal circumstances, the Fund will invest at least 80% of its total assets in components of the Index or in instruments with similar economic characteristics.

The Fund will invest principally in the securities listed below.

- **Equity Securities** — Common stock issued by public companies.
- **Depository Receipts** — The Fund may invest in depository receipts, which principally include:
 - **American Depositary Receipts (ADRs)**, which represent the right to receive securities of foreign issuers deposited in a bank or trust company and are an alternative to purchasing the underlying securities in their national markets and currencies.
 - **Global Depositary Receipts (GDRs)**, which are receipts for shares in a foreign-based corporation traded in capital markets around the world.

ProFund Advisors uses a mathematical approach to investing in which it determines the type, quantity and mix of investment positions that it believes, in combination, the Fund should hold to produce returns consistent with its investment objective. The Fund seeks to remain fully invested at all times in financial instruments that, in combination, provide exposure consistent with the investment objective, without regard to market conditions, trends or direction. The Fund may also invest in or gain exposure to only a representative sample of the securities in the Index or to securities not contained in the Index or in

financial instruments, with the intent of obtaining exposure consistent with the investment objective.

The Index is created and sponsored by ProFund Advisors and is licensed for use by ProFunds.

Please see “Investment Objectives, Principal Investment Strategies and Related Risks” in the Fund’s Prospectus for additional details.

Principal Risks

You could lose money by investing in the Fund.

- **Asian Investments Risk** — Investments in securities of issuers in certain Asian countries involve risks that are specific to Asia, including certain legal, regulatory, political and economic risks. Certain Asian countries have experienced expropriation and/or nationalization of assets, confiscatory taxation, institution of tariffs or other trade barriers, political instability, armed conflict and social instability as a result of religious, ethnic, socio-economic and/ or political unrest. Some economies in this region are dependent on a range of commodities, and are strongly affected by international commodity prices and particularly vulnerable to price changes for these products. The market for securities in this region may also be directly influenced by the flow of international capital, and by the economic and market conditions of neighboring countries. Many Asian economies have experienced rapid growth and industrialization, and there is no assurance that this growth rate will be maintained. Some Asian economies are highly dependent on trade and economic conditions in other countries can impact these economies.
- **Equity and Market Risk** — Equity markets are volatile, and the value of equity securities and other instruments correlated with equity markets may fluctuate dramatically from day to day. Equity markets are subject to corporate, political, regulatory, market and economic developments, as well as developments that impact specific economic sectors, industries or segments of the market.
- **Foreign Currency Risk** — Investments linked to or denominated in foreign currencies are exposed to additional risk factors versus those investments denominated in U.S. dollars and linked to U.S. investments. The value of an investment linked to or denominated in a foreign currency could change significantly as foreign currencies strengthen or weaken relative to the U.S. dollar.
- **Foreign Investments/Emerging Market Risk** — Exposure to securities of foreign issuers may provide the Fund with increased risk. Foreign investments may be more susceptible to political, social, economic and regional factors than may be the case with U.S. securities. In addition, markets for foreign investments are usually less liquid, more volatile and significantly smaller than markets for U.S. securities, which may affect, among other things, the Fund’s ability to purchase or sell foreign investments at appropriate times and prices. Because of differences in settlement times and/or foreign market holidays, transactions in a foreign market may take

place one or more days after the necessary exposure to these investments is determined.

Because the Fund’s foreign investment exposure may include issuers domiciled in developing or “emerging market” countries, all the aforementioned factors are heightened. Investments in emerging markets are considered speculative.

- **Correlation Risk** — A number of factors may affect the Fund’s ability to achieve a high degree of correlation with the Index. Fees, expenses, transaction costs, among other factors, will adversely impact the Fund’s ability to meet its investment objective. In addition, the Fund’s exposure may not be consistent with the Index. For example, the Fund may not have exposure to all of the securities in the Index, its weighting of securities may be different from that of the Index, and it may invest in instruments not included in the Index.
- **Industry Concentration Risk** — The Index may have a significant portion of its value in issuers in an industry or group of industries. The Fund will allocate its investments to approximately the same extent as the Index. As a result, the Fund may be subject to greater market fluctuations than a fund that is more broadly invested across industries. As of December 31, 2024, the Index had a significant portion of its value in issuers in the consumer discretionary, financials, media & entertainment and semiconductors & semiconductor equipment industry groups.
 - **Consumer Discretionary Industry Risk** — Companies in this industry may experience: impact of changing economic conditions, interest rates, competition and consumer confidence; heavy dependence on disposable household income and consumer spending; severe competition; and changes in demographics and consumer tastes.
 - **Financials Industry Risk** — Companies in this industry may experience: extensive governmental regulation and/or nationalization that affects the scope of their activities, the prices they can charge and the amount of capital they must maintain; adverse effects from increases in interest rates; adverse effects on profitability by loan losses; and severe competition.
 - **Media and Entertainment Industry Risk** — Companies in this sector may experience: high costs of research and development of new content and services; changing consumer tastes, and changing consumer discretionary income patterns.
 - **Semiconductors and Semiconductor Equipment Industry Risk** — Companies in this sector may experience: intense competition, wide fluctuations in securities prices due to risks of rapid obsolescence of products, significant research costs, and limited product lines, markets, financial resources or personnel.

Companies in this sector may also be affected by risks that affect the broader technology sector.

- **Geographic Concentration Risk** — Because the Fund focuses its investments in one or more foreign countries, an investment in the Fund may be more volatile than a more geographically diversified fund. The performance of the Fund will be affected by the political, social and economic conditions in those foreign countries and subject to the related risks. As of December 31, 2024, the Index had a significant portion of its value in issuers in China and India.

- **Chinese Investments Risk** — Investments in securities of issuers in China include risks such as, less developed or less efficient trading markets; currency fluctuations or blockage; nationalization of assets; limits on repatriation; institution of tariffs or other trade barriers; uncertainty surrounding trading suspensions; and a lack of publicly available information China is an emerging market and demonstrates significantly higher volatility from time to time in comparison to developed markets.

- **Indian Investments Risk** — Investments in securities of issuers in India include risks such as, greater government control over the economy, including the risk that the Indian government may decide not to continue to support economic reform programs, political and legal uncertainty, competition from low-cost issuers of other emerging economies, institution of tariffs or other trade barriers, currency fluctuations or blockage of foreign currency exchanges and the risk of nationalization or expropriation of assets. India has been prone to natural disasters, such as earthquakes and tsunamis which could have a significant negative impact on its economy.

- **Non-Diversification Risk** — The Fund has the ability to invest a relatively high percentage of its assets in the securities of a small number of issuers. This may increase the Fund's volatility and increase the risk that the Fund's performance will decline based on the performance of a single issuer.

- **Self-Indexing Performance Risk** — The Index used by the Fund may underperform other asset classes and may underperform other similar indices. The Index is sponsored by ProFund Advisors. There can be no guarantee that the methodology underlying the Index or the daily calculation of the Index will be free from error.

- **Active Investor Risk** — The Fund permits short-term trading of its securities. This may have a negative impact on the Fund's ability to achieve its investment objective or maintain a

consistent level of operating expenses. In certain circumstances, the Fund's expense ratio may vary from current estimates or the historical ratio disclosed in this Prospectus. In addition, this will increase portfolio turnover and may result in additional costs for the Fund.

- **Early Close/Late Close/Trading Halt Risk** — An exchange or market may close early, close late or issue trading halts on specific securities or financial instruments. In these circumstances, the Fund may be unable to rebalance its portfolio, may be unable to accurately price its investments and/or may incur substantial trading losses.

Please see "Investment Objectives, Principal Investment Strategies and Related Risks" in the Fund's Prospectus for additional details.

Investment Results

The bar chart below shows how the Fund's investment results have varied from year to year, and the table shows how the Fund's average annual total returns for various periods compare with different broad measures of market performance. This information provides some indication of the risks of investing in the Fund. The Fund's performance information reflects applicable fee waivers and/or expense limitations in effect during the period presented. Absent such fee waivers/expense limitations, if any, performance would have been lower. It does not reflect charges and fees associated with a separate account that invests in the Fund or any insurance contract for which it is an investment option. Charges and fees will reduce returns. Past results are not predictive of future results.

Annual Returns as of December 31

Best Quarter (ended 6/30/2020): 25.46%

Worst Quarter (ended 9/30/2022): -21.46%

The year-to-date return as of the most recent quarter, which ended March 31, 2025, was 8.58%.

Average Annual Total Returns

As of December 31, 2024

	One Year	Five Years	Ten Years	Inception Date
ProFund VP Asia 30	11.56%	-0.58%	1.93%	5/1/2002
ProFunds Asia 30 Index^{®1}	9.44%	-1.03%	1.58%	
MSCI AC Asia Pacific Free Excluding Japan Index²	10.15%	3.02%	4.66%	
S&P Global 1200 Index³	18.97%	11.38%	10.43%	

- 1 Price return index that does not include dividends.
- 2 Reflects no deduction for fees, expenses or taxes. Adjusted to reflect the reinvestment of dividends paid by issuers in the Index.
- 3 Reflects no deduction for fees, expenses or taxes. Returns are gross returns that do not reflect the reduction of any withholding taxes, and are adjusted to reflect the reinvestment of dividends paid by companies in the Index.

Management

The Fund is advised by ProFund Advisors. Alexander Ilyasov, Senior Portfolio Manager, and Eric Silverthorne, Portfolio Manager, have jointly and primarily managed the Fund since August 2020 and March 2023, respectively.

Purchase and Sale of Fund Shares

Shares are available for purchase by insurance company separate accounts to serve as an investment medium for variable insurance contracts, and by qualified pension and retirement plans, certain insurance companies, and ProFund Advisors. Investors do not contact the Fund directly to purchase or redeem shares. Please refer to the prospectus of the relevant separate

account for information on the allocation of premiums and on transfers of accumulated value among sub-accounts of the separate accounts that invest in the Fund.

Tax Information

The Fund normally distributes its net investment income and net realized capital gains, if any, to its shareholders. If you are a holder of a contract or policy that invests in the Fund through an insurance company separate account, then these distributions will generally not be taxable to you; please consult the prospectus or other information provided to you by the insurance company regarding the tax consequences of your contract or policy. If you are a holder of such a contract or policy, or if you are investing through a pension or retirement plan that is a tax-advantaged arrangement, you may be taxed later upon distributions with respect to or from those contracts or arrangements. The Fund intends to distribute income, if any, and capital gains, if any, at least annually.

Payments to Insurance Companies and Other Financial Intermediaries

The Fund or its distributor (and related companies) may pay insurance companies, which in turn may pay broker-dealers or other financial intermediaries (such as banks and insurance companies, or their related companies) for the sale and retention of variable contracts and/or policies which offer Fund shares. These payments may create a conflict of interest for a financial intermediary selling such variable contracts and/or policies, or may be a factor in the insurance company's decision to include the Fund as an investment option in its variable contract or policy. For more information, ask your financial advisor, visit your financial intermediary's website or consult the prospectus for the contract or policy.
